

Robótica Computacional

Prof. Antonio Selvatici

AntonioHPS1@insper.edu.br

Semana 3 – Detecção e Tracking

Leitura sugerida: Russel & Norvig, Cap.
20, seção 20.5

Tracking de objetos

https://www.youtube.com/watch?v=WyDcXtVb8_U

Detecção e tracking

Vídeo em: <https://www.pyimagesearch.com/2018/07/30/opencv-object-tracking/>

Problemas do tracking:

- Oclusão
- Duplicidade
- Mudança de perspectiva
- Movimento rápido

A detecção costuma ser mais lenta, mas é onde começa
Detecção hoje em dia -> Deep Learning

Detecção de dígitos – MNIST

O neurônio biológico

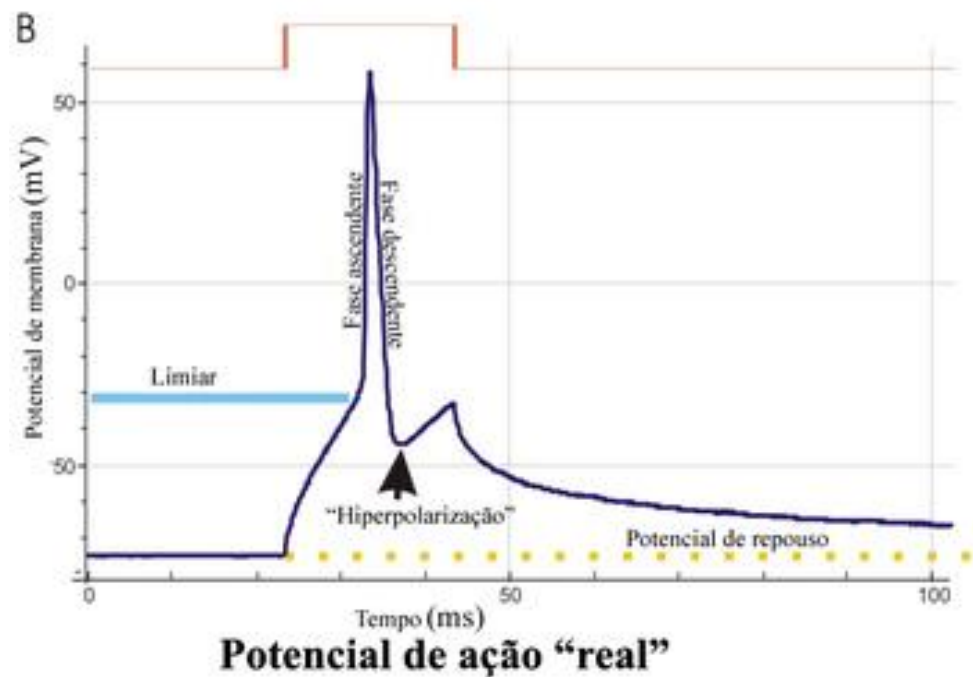

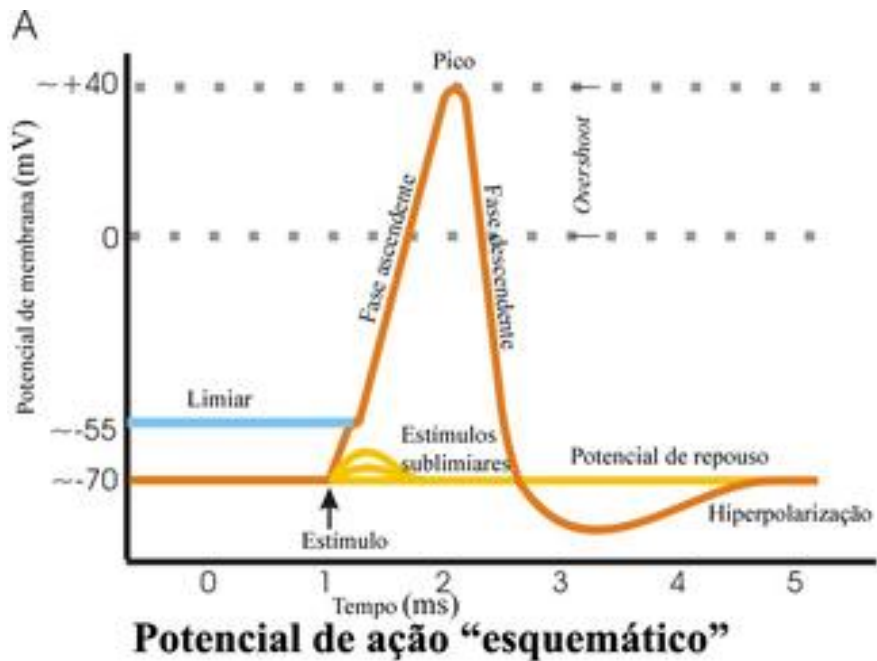

Conexão entre neurônios
